

John Lloyd Puda

Video Editor & Technical Specialist

General Santos City, Philippines | 09777763826 | johnlloyd puda@gmail.com

Profile

I am a dynamic Video Editor and IT Specialist dedicated to crafting high-retention digital content that drives audience engagement. By mastering the full Adobe Premiere Pro and After Effects workflow, I transform raw footage into compelling short-form media, polished podcasts, and engaging UGC. My unique technical background in automation allows me to build highly efficient post-production workflows, ensuring lightning-fast turnarounds without ever sacrificing broadcast-level quality.

Employment History

Freelance Video Editor & Technical Specialist

Freelance / Self-Employed | General Santos | Jan 2023 – Present

- End-to-End Post-Production: Manage the complete video editing lifecycle from raw footage ingestion to final export, ensuring rigorous quality control and broadcast-level audio-visual standards.
- High-Retention Content Creation: Engineered short-form series and promotional social media campaigns for TikTok and YouTube Shorts utilizing dynamic motion graphics, precise pacing, and synced typography, resulting in significantly increased average view duration and higher audience retention for client brand channels.
- Podcast & UGC Optimization: Transformed long-form raw audio/video into polished, YouTube-ready podcast episodes. Produced authentic, high-converting User-Generated Content (UGC) tailored for targeted marketing pipelines.
- Field Production: Assisted in live field production as a Junior Cameraman, executing strategic camera angles and cinematic framing for local entertainment media.
- Workflow Automation: Leveraged an IT background to write custom JavaScript/Node.js scripts and Adobe ExtendScript, automating repetitive pipeline tasks like proxy generation and subtitle syncing. This concrete workflow change shortened the post-production pipeline and reduced project turnaround times by over 30%.

Education

Bachelor of Science in Information Technology

STI General Santos City | 2022 – 2026

- Developed a strong foundation in workflow automation, web development (React), and systems administration, allowing for highly optimized and technically sound post-production workflows.
- Mastered complex software architectures and troubleshooting, directly translating to advanced proficiency in industry-standard tools like Adobe Premiere Pro and After Effects.
